

Meet the partners

A multidisciplinary consortium bringing together 16 partners from 7 European countries, combining excellence in artificial intelligence, robotics, advanced manufacturing, healthcare innovation, sensing technologies, and industrial applications. Together, the partners drive the development and validation of innovative XR and AI-powered solutions for the factories of the future.

Finland

Aalto University

Advancing innovation in intelligent systems, digital technologies, and future industrial solutions.

Germany

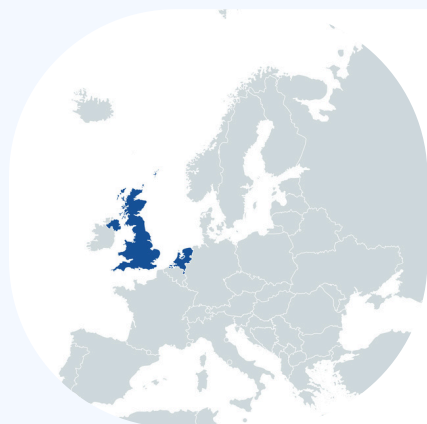

DFKI, Graphicvision.ai & Neurofai

Expertise in artificial intelligence, machine learning, and industrial AI applications.

Italy & Switzerland

Sant'Anna, Politecnico di Milano, MADE, MASMEC, EIT Manufacturing South & ETH Zürich
Combining excellence in robotics, advanced manufacturing, engineering, AI, and technology transfer.

Netherlands & United Kingdom

Brembo NV, Neuranics & De Montfort University
Contributing industrial leadership, advanced sensing technologies, and innovation-driven research.

Spain

UPV, UIJ & VHIR

Driving innovation in engineering, digital technologies, healthcare research, and applied AI.
