

BRINGING XR CLOSER TO THE REAL WORLD

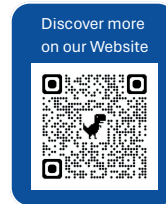

ABOUT US:

- **Horizon Europe Project:** A 36-month initiative launched in June 2026.
- **Our Mission:** Unifying Extended Reality, AI, and Digital Twins to connect physical and virtual environments seamlessly in real time.

ABOUT THE TECHNOLOGIES:

- **Smart Sensing:** Tracks gestures, speech, and biosignals for natural interaction.
- **Digital Twins:** Instant synchronization between physical and virtual spaces.
- **AI Co-Pilots:** Intelligent guidance to assist users through complex tasks.
- **Interoperable Platform:** Connects XR devices to existing factory and hospital systems with no vendor lock-in.
- **No-Code Learning:** Converts real-world tasks into training lessons and recognized credentials without coding.

USE CASES:

AUTOMOTIVE:
Manufacturing &
assembly

ROBOTICS
Human-robot
collaboration

REHABILITATION
Virtual
environments

LEARNING BY DOING:
TURNING REAL ACTIVITIES
INTO XR TRAINING AND
DIGITAL CREDENTIALS
